Traditional ways of handling digital information is a safe bet that tasks will be completed successfully in a familiar environment. For example, writing up student records using Microsoft Word, or storing all related worksheets for your Mathematics class in a Folder labelled "Mathematics". These methods work, but tasks like these can be achieved far more efficiently.

Finding Information Fast

One of the most frustrating issues when trying to get work done is not being able to locate the files you require. How many times have you misplaced a file only to spend ages hunting it down? Your time is better spent if the files you need are in a single location so that you can complete the tasks more efficiently. With more time on your hands you can not only get more done, but also enjoy more time devoted to other pastimes, your friends, and family. A product that helps keep your digital information organized is [InfoHesive](#).

Sharing Information with Colleagues

InfoHesive is great for organizing lecturer and teacher notes, teaching material, student records, and any other personal information. You can even include photos of your students or classmates for easier identification, especially at the beginning of school terms. Not only is InfoHesive useful in retrieving your information efficiently, with a digital publisher-built in, InfoHesive lets you share your digital information with your colleagues or classmates as well.

Create Worksheets and Teaching Materials

InfoHesive also provides a Help File Workspace that allows you to develop an InfoHesive document containing teaching materials like worksheets for each topic of a subject that can be easily distributed. In fact any file, including Office documents, can be bundled with the help file resource for you to distribute to your readership. Whether your supporting resources are teaching schedules, worksheets, or other teaching materials in PDF format, all you have to do is link to the required files in your InfoHesive Help File, and each linked file will automatically be copied to a special assets folder that you will distribute along

with your InfoHesive Help file. When your readership receives the InfoHesive WorkSpace and Folder, they'll get all their resources in one neat package. No more tracking down each associated resource - with InfoHesive managing your digital resources will be a whole lot easier and more efficient.

Easily Distribute InfoHesive Documents

Need an easier way of distributing information to colleagues and even students without the need of them having to download a software? Great news! InfoHesive provides you with the ability to convert your InfoHesive file into an executable file (.exe file) where just a quick click of the mouse will reveal the contents of the file. Simply put, only the creator of the InfoHesive file requires a copy of InfoHesive. Everyone else who reads it doesn't.

Safe and Secure

If the InfoHesive files that you are sharing contains sensitive information, never fear because there is an in-built encryption feature within InfoHesive. Password-protect your InfoHesive files and share them securely on your school's common server, and you will be able to rest assured only assigned colleagues will have access to the information.

With so many possibilities with [InfoHesive](#), give it a try - it's obligation-free. I'm sure you'll soon love it as much as we do!
